

## TABLE OF CONTENTS

|                   |   |            |
|-------------------|---|------------|
| <b>I</b>          | <b>FAULT DIAGNOSIS AND FAULT-TOLERANT CONTROL<br/>: PLENARY LECTURES.....</b>   | <b>1</b>   |
| <b>Chapter 1</b>  | <b>On statistical change detection for FDI</b><br><i>M. Basseville.....</i>   | <b>3</b>   |
| <b>Chapter 2</b>  | <b>Fault diagnosis and fault tolerant control: an optimization based approach</b><br><i>J. Stoustrup.....</i>                             | <b>23</b>  |
| <b>Chapter 3</b>  | <b>Fault-tolerant model predictive control</b><br><i>E.F. Camacho, T. Alamo, D. M. de la Peña.....</i>                                    | <b>43</b>  |
| <b>Chapter 4</b>  | <b>Fault-tolerant control — is it possible?</b><br><i>J.M. Maciejowski.....</i>   | <b>63</b>  |
| <b>Chapter 5</b>  | <b>Integrate design of wireless fault tolerant networked control systems</b><br><i>S. Ding.....</i>                                       | <b>73</b>  |
| <b>Chapter 6</b>  | <b>Advances of IR-thermal diagnostics in medicine</b><br><i>A. Nowakowski, M. Kaczmarek, M. Bajorek, M. Moderhak, M. Suchowirski.....</i> | <b>85</b>  |
| <b>II</b>         | <b>FAULT-TOLERANT CONTROL SYSTEMS.....</b>  | <b>105</b> |
| <b>Chapter 7</b>  | <b>A concept for fault tolerant controllers</b><br><i>H. Niemann, N.K. Poulsen.....</i>   | <b>107</b> |
| <b>Chapter 8</b>  | <b>Actuator fault-tolerant control for satellites in rendezvous mission</b><br><i>A. Chamseddine, C. Join, D. Theilliol.....</i>          | <b>115</b> |
| <b>Chapter 9</b>  | <b>Fault tolerant control in MFC/IMC structure</b><br><i>J. Brzózka.....</i>  | <b>123</b> |
| <b>Chapter 10</b> | <b>Towards a fault-robust GPC implementation</b><br><i>P. Gawkowski, M. Ławryńczuk, P. Marusak, J. Sosnowski, P. Tatjewski.....</i>       | <b>131</b> |
| <b>Chapter 11</b> | <b>Fault accommodation in dynamic systems: logic-dynamic approach</b><br><i>A. Shumsky, A. Zhirabok, E. Bobko.....</i>                    | <b>141</b> |

|                   |   |     |
|-------------------|---|-----|
| <b>III</b>        | <b>ESTIMATION AND IDENTIFICATION METHODS</b> .....  | 149 |
| <b>Chapter 12</b> | <b>Active fault isolation and estimation</b><br><i>N.K. Poulsen, H. Niemann</i> .....   | 151 |
| <b>Chapter 13</b> | <b>Parameters estimation methods in the robust fault diagnosis</b><br><i>M. Mrugalski, J. Korbicz</i> .....   | 159 |
| <b>Chapter 14</b> | <b>Asynchronous distributed state estimation based on continuous time stochastic model</b><br><i>Z. Kowalczyk, M. Domzalski</i> .....                 | 167 |
| <b>Chapter 15</b> | <b>Continuous-time delay systems identification insensitive to measurement faults</b><br><i>J. Kozłowski, Z. Kowalczyk</i> .....                      | 177 |
| <b>IV</b>         | <b>OPTIMAL AND ACTIVE SENSOR DESIGNS</b> .....  | 185 |
| <b>Chapter 16</b> | <b>An industrial approach to active sensor configuration validation</b><br><i>R. Izadi-Zamanabadi, L.F.S. Larsen, C. Thybo</i> .....                  | 187 |
| <b>Chapter 17</b> | <b>Mobile sensor routing for detection of moving contamination sources – part 1: optimal control formulation</b><br><i>D. Uciński, M. Patan</i> ..... | 195 |
| <b>Chapter 18</b> | <b>Mobile sensor routing for detection of moving contamination sources – part 2: algorithms and results</b><br><i>M. Patan, D. Uciński</i> .....      | 203 |
| <b>Chapter 19</b> | <b>Designing optimal and safe control strategies for time-varying dynamical systems</b><br><i>Z. Kowalczyk, K.E. Olinski</i> .....                    | 211 |
| <b>V</b>          | <b>FAULT DIAGNOSIS OF INDUSTRIAL PROCESSES</b> .....  | 219 |
| <b>Chapter 20</b> | <b>Diagnostic-relation determination assist on the ground of extended process graphs</b><br><i>M. Syfert</i> .....                                    | 221 |
| <b>Chapter 21</b> | <b>A modified algorithm of fault isolation in decentralised structures</b><br><i>M. Syfert</i> .....  | 229 |
| <b>Chapter 22</b> | <b>The issue of diagnostic reasoning in the case of variability of diagnosed system structures</b><br><i>M. Syfert, J.M. Kościelny</i> .....          | 237 |

---

|                   |   |     |
|-------------------|---|-----|
| <b>Chapter 23</b> | <b>Diagnostic tool for detecting malfunctions in district heating objects based on power-flow models</b>                  |     |
|                   | <i>S. Kiluk</i> .....   | 245 |
| <b>VI</b>         | <b>SOFT COMPUTING APPROACHES</b> .....  | 253 |
| <b>Chapter 24</b> | <b>A constraint satisfaction framework for diagnostic problems</b>  |     |
|                   | <i>A. Ligeza</i> .....  | 255 |
| <b>Chapter 25</b> | <b>Locally recurrent networks for fault approximation and accommodation</b>   |     |
|                   | <i>K. Patan</i> .....   | 263 |
| <b>Chapter 26</b> | <b>Locally recurrent neural networks and recurrence quantification analysis in fault detection of dynamical processes</b> |     |
|                   | <i>P. Przystalka</i> .....  | 271 |
| <b>Chapter 27</b> | <b>Cytological image segmentation using fuzzy clustering</b>  |     |
|                   | <i>M. Kowal, A. Obuchowicz</i> .....  | 283 |
| <b>Chapter 28</b> | <b>Application of probabilistic neural networks for fault detection in rotating machinery</b>                             |     |
|                   | <i>T. Barszcz, A. Bielecki, T. Romaniuk</i> .....   | 291 |
|                   | <b>Abstracts</b> .....  | 299 |
|                   | <b>Index of Authors</b> .....   | 305 |
|                   | <b>List of Reviewers</b> .....  | 306 |
