Abstract. This instruction gives basic guidelines for preparing the papers for the Conference Proceedings in a uniform editorial layout. Use this document as an instruction set. Abstract should be kept within 15 lines of text. *(10 points)*

1. INTRODUCTION

Proceedings of the 6th National Science and Technology Conference on *DIAGNOSTICS OF INDUSTRIAL PROCESSES* will be printed by the camera-ready method without any editor corrections. The Organising Committee strongly recommends following strictly the rules presented bellow. *(11 points)*

2. PAPER FORMAT

- paper should contain an even number of pages but not more than six pages,
- paper size: A4,
- preferred text editor: *MS WORD or LATEX*,
- suggested font: *Times New Roman*,
- use 10-point fonts for the paper header, abstract, references, figures and tables titles,
- use 11-point fonts for the body of the paper,
- paper should be printed it in the two-column format, including figures and tables,
- column width: 75 mm,
- distance between columns: 10 mm,
- page height: 250 mm,
- all the margins: 25 mm,
- allowable number of rows in a column: 55,
- place the Conference title in the header of the first page of the paper (see the file: FORMAT.doc). *(10 points)*
- figures should be fixed in the right places of the paper or printed along with the text,
- place the figure numbers (e.g. Fig. 1.) with their titles below the figures, *(10 points)*
- place table numbers (e.g. Table 1.) with their titles above the tables, *(10 points)*
- enumerate equations consecutively with their numbers in parentheses located to the right side of the column,
- enumerate the bibliographical references in square brackets [1], according to a list of references given in an alphabetical ordering at the end of the paper,
- print on one side of A4 sheets using a high-quality laser printer, and number the pages with a soft pencil on the reverse side.

3. SUMMARY

Note that the quality of the ready-made papers affects the appearance of the Conference Proceedings.

For your convenience, this instruction has been prepared following the above described rules. *(11 points)*
